ABOUT BITS & STACK ACADEMY

Bridging the gap between theory and production engineering

At **Bits & Stack Academy**, we focus strictly on practical learning rather than theoretical concepts. Every programme is engineered to prepare students for high-impact software engineering roles by integrating industry best practices, hands-on assignments, production-grade projects, personalized mentorship, rigorous code reviews, and structured interview preparation. Our mission is to create engineers who can confidently contribute to enterprise software teams from Day 1.

PK

Prabhuling K.

Founder & Lead Instructor | 10+ Years IT Industry Experience

With over a decade of real-time software engineering and technical mentorship experience, Prabhuling leads the curriculum and hands-on training at Bits & Stack Academy. Having spent 10 years building scalable production systems and mentoring engineering talent, he brings real-world industry standards, architecture practices, and direct interview insights straight to the classroom.
